J. R. E. COBURN
GENERAL MERCHANT, CARBON

Country News

Mr. and Mrs. Theodore Neher and children and Mr. and Mrs. J. F. Ohlhauser and children returned on Saturday after a two months visit with relatives in California. They all enjoyed the trip, but are glad to be back again.

Mr. and Mrs. J. A. Ohlhauser and family returned Saturday after visiting for a few days in Calgary with Mr. Ohlhauser's parents.

Chris Weigum and Peter Schumacher were visitors at the home of Mr. and Mrs. Ed. Schell this week.

Mr. Fred Ohlhauser and Mrs. G. Ohlhauser went to Calgary Tuesday to visit Mrs. Fred Ohlhauser, who is ill in the Calgary hospital.

The sister and brother of James

JOLLY TIME HAD AT PARTY LAST THURSDAY

The Masonic hall was a place of great excitement last Thursday evening, when a number of the Carbon people attempted to create the styles of 1937 ten years before their time. The ladies wore the now fashionable balloon trousers and pullovers, while others wore the more formal tuxedos or dress suits. The gentlemen wore various styles of dresses, not to mention the array of silk stockings, bloomers and jazz garters, which were displayed below the short skirts of the none too modest gentlemen. After the guests had all arrived card playing was commenced and after a delicious luncheon the party began to dance.

The bridge winners for the evening were: ladies' first, Mrs. A. McLeod; 2nd., Mrs. T. Ramsay. Men's first, C. H. Nash; 2nd. A. McLeod. Middle prizes: ladies' first, Mrs. McFarlane; 2nd. Miss L. Smith. Men's first, Mr. Coburn; 2nd. Mr. Edwards. Low prizes: Mrs. Hay and J. O'Rourke.

Prize for best dressed gentleman went to Mrs. McGregor, and for the best dressed lady to Mr. Coburn.

The hostesses for the evening were Mrs. H. Wilson, Mrs. G. W. Malton and Mrs. G. Peters.

and Art Hudson, who visited them last week, returned to Nanton on Monday.

It was reported in last week's paper that Mrs. Stenberg was home. Mr. Stenberg returned, but she is still in Cranbrook.

Mrs. Megget and Mr. Currie were quietly married in Calgary last week and their friends wish them success and happiness in the years to come.

R. S. Shaw and L. B. Hart who were away to the U.F.A. convention, stayed over Saturday and Sunday visiting friends in Edmonton. They spent Saturday morning visiting the Dominion Grain Inspection Department and advise all grain growers to take the first opportunity to visit this dept. either in Calgary or in Edmonton. They found the officials most courteous and ready to explain in minute detail the manner of taking samples from cars and grading the grain.

Friends of Mrs. (Rev.) Robertson will be glad to know that she and her family are well and enjoying life in the University city.

Messrs. S. N. Wright and Geo. Webber, the municipal delegates, had a very successful trip.

OLD TIMERS ASSOCIATION HOLD MEETING

At a meeting of the Old Timers' Association held in the Hopp Inn on Saturday afternoon, Jan. 22nd, Ross Thorburn was elected president, J. Ramsay vice-president and Fred Poxon sec-treas. It was decided to hold the annual celebration in the Farmers' Exchange hall on Thursday, Feb. 10th. The annual meeting of the association will be held the evening of the celebration so as to ensure a full attendance. Special mention was made to the fact that only those persons who settled in this district prior to Jan. 1, 1907 or their children who were born before that date would be eligible to attend.

Swalwell

Messrs. R. Jennings, G. Wacker and J. Wulff Jr., have all returned from Calgary, where each has undergone an operation, and all are now rapidly regaining their usual good health.

Congratulations to Mr. and Mrs. J. C. Umpey on the birth of a daughter.

Alterations are now in progress on the house lately vacated by R. Shreeve, which house to accommodate the new telephone office.

Mr. and Mrs. M. Huston are taking over the telephone service which is being relinquished by the postmaster.

At a five hundred party arranged by and held in the home of Mrs. Clarke, the sum of \$38.00 was raised for the Wood's Homes, which are now removed to new quarters in Calgary.

The Swalwell Bonspiel has been arranged to commence on the 2nd. of February and will be of three days duration. There will be two main events and the consolation. The draw will take place at noon on Tuesday. Among other things to be competed for is a very handsome trophy presented by the Lethbridge Brewery.

Mrs. Long, who has been visiting Mr. and Mrs. T. Leary, has left for her home in N. Dakota.

Mrs. Kletsky has returned after an extended visit in B. C.

Phillis Calder was also among those returning from the Calgary hospital.

A service is to be held in the Union church on Sunday afternoon and will be conducted by Mr. Isaac Mastre, of North Dakota. This service is an extension of a series of services now being held in the Mennonite church west of Swalwell. A hearty welcome is extended to everyone.

The Carbon Chronicle

Nova Scotia Noted For Its Hunting Facilities

Reports of excellent big game hunting in Nova Scotia this season have been received at the tourist department of the Canadian Pacific Railway in Montreal. Hunters have returned with tales of super-moose, seemingly endowed with more than usual cunning, thus adding to the interest in this sport. A large section of the interior is a maze of beautiful lakes, woods and streams where moose are plentiful despite the fact that about 1,200 bulls are killed by hunters each year between October 1st and November 15th, the open season. Cow moose and young calves are protected. Water approaches to the hunting grounds are but a short motor-ride from Digby and Annapolis Royal on the Dominion Atlantic Railway.

Many hunters penetrate the wilderness by canoe from south Milford at the head of the Liverpool chain of lakes, or by motor truck which

transports hunters, guides, duffel and canoes to Kedgemakoogee and other haunts of the moose. Some of the best guides are the Micmac Indians, there being also plenty of efficient white guides at Del Thomas' South Milford Camp and Kedgemakoogee.

But one bull moose may be bagged each season by a hunter. The majority of moose are killed each year in 13 of the 18 counties. Moose and caribou are plentiful on Cape Breton Island but the hunting of these animals at the present time is

prohibited on the Island. Bear and wildcat, for which there is no closed season, roam the woods of Nova Scotia. Ruffed grouse, woodcock, snipe, wild geese and many other varieties of small game are plentiful and afford the hunter every opportunity of an excellent hunting holiday. The province too is a mecca for the angler. The many streams and lakes abound with salmon and trout. Off the coast tuna, cod, haddock, pollack and flounder fishing is extensively indulged in.

BUY COAL DIRECT FROM MINE

To introduce VICTORY coal, mined 45 miles West of Edmonton, in the foothills of the mountains. We offer in carlots of 30 tons or over.

Canada and Japan

Dr. H. M. Tory, president of the University of Alberta and chairman of the National Research Council of Canada, represented Canada at the scientific conference of all countries having an outlet on the Pacific, which was held a few months ago in Japan, and in a recent address before the Canadian Club of Saskatoon he gave some of his impressions of Japan and its people. Dr. Tory's highly entertaining and instructive address contained much food for thought on the part of Canadians.

In extent of area, Dr. Tory pointed out, Japan is about three-fifths the size of Alberta and Saskatchewan, and of that area only about twenty per cent. is capable of cultivation. Nevertheless, the islands of Japan are inhabited by almost sixty millions of people. Therefore, Japan, like the British Isles, must provide for the subsistence of its people by the importation of enormous quantities of foodstuffs, and for their employment in other ways than agriculture, Japan has as a consequence become a highly industrialized nation.

Japan is frequently referred to as the Great Britain of the Pacific, and the description is an apt one. Not only is there an analogy as noted in the preceding paragraph, but Japan, like Britain, has developed a large and growing merchant marine and is offering effective competition in the markets of Pacific countries. In another respect Japan is adopting British methods. It is importing raw materials from other lands, converting them into articles of manufacture, and then reselling the finished product even in the very countries from which the raw materials were imported.

For example, Japan is importing raw cotton from the United States, manufacturing it, and selling the manufactured articles in the United States in competition with American and British manufacturers after paying heavy United States customs duties.

In the first six months of last year Japan imported forty million more bushels of wheat than in the corresponding period of the previous year. Flour mills are being erected to grind this wheat into flour, not only to supply the home demand, but for export.

Japan, said Dr. Tory, is just as keenly interested in promoting its export trade, and just as much concerned about an adverse balance of trade, as Canadians are in respect to this Dominion. The Japanese realize that they must import huge quantities of food, and they are determined to pay for these imports through the sale of the products of their industries. This is a situation of which Canada and the world must take cognizance.

No people stand higher in the estimation and confidence of the people of Japan than do those of the British Empire. The English language is taught in all the schools, and realizing that English is, and to an ever increasing extent will be, the language of commerce, Japan is in every way encouraging its people to learn it so that within a generation or two every educated person in Japan will have a command of the language. Every year, too, the brightest students from Japanese universities are sent all over the world to learn everything in the arts and sciences that the best thought and the latest invention has to offer.

Canada has a golden opportunity before it for the development of trade and commerce with Japan on a truly gigantic scale. The Dominion has for sale an abundance of many of the things which Japan lacks and must buy. As a British people there is a friendly feeling for us. The two countries face one another across the Pacific with lines of communication already established. One thing remains for the people of Canada to learn and to do if full advantage is to be taken of the opportunities awaiting it in Japan and the Orient as a whole.

Canada is a young, large, and undeveloped country. Japan is an old land with a history under one ruling dynasty dating back to hundreds of years before Christ. The family of the present Emperor has ruled over Japan in an unbroken line for 2,600 years. Japan is a small country, densely populated, is fully developed and highly industrialized, its people are intensely patriotic, of a high order of intelligence, and very proud. To the extent that Canadians are obsessed with the Western idea that the Japanese are an inferior people, they will fall in making headway in Japan. Canadians will have to do business with them as with equals. It will not do to offer to Japan our third rate or even second rate products, nor to regard that country as a dumping ground for what cannot be sold elsewhere. Japan will not be so treated. It must be given the best we have to offer.

If Canadians generally come to appreciate this, and act accordingly, there is hardly any limit that can be placed on the future trade between the two countries—a trade in which Western Canada will reap a rich return.

"I am at the end of my rope," remarked the lounge lizard to a chance woman between you and your husband; she follows him about wherever he goes," was the response. "Now he goes," throw away the butt and smoke a Client—"I'm sorry for her, then good one."

Fortune Teller—"I see a tall, stout woman between you and your husband; she follows him about wherever he goes."

Client—"I'm sorry for her, then good one."

Winter Travel In North Hard

Fur Traders Encounter Difficulties on Trail to Edmonton

The trials and tribulations of winter travel in the northern wilds were recounted by a party of fur traders who fought their way through blizzards, snowdrifts and bitter cold, to Edmonton.

Joe Larcombe, a northern pioneer, was the leader of the group which included four other trappers.

Each had his own background of misadventure, which forced him to "hit the trail" toward civilization at this time of the season and all pooled their resources and banded together for the trip.

The party had five horse-drawn sledges and came down from the Arctic regions by way of the Athabasca river. In places the ice was piled from 15 to 20 feet high and the little caravan was forced to travel between huge ice cliffs and other hazards. In other places the river was covered with a thin sheet of ice which broke as soon as the horses put foot on it. Several times the animals went through but were rescued. To negotiate the most dangerous stretches of the river, the trappers unchained the horses and pushed the sledges to safer ice. Constantly two members of the party preceded the sledge fleet, breaking test holes to spot the safest way.

The men faced extreme hardships on their long trek. The mercury at times skidded to 30 and 40 below zero. During one night's hunt, the caravan was caught in a howling blizzard and in the morning two sledges were buried under heavy snow drifts and had to be shovelled out. The men were pretty well worn out when they reached Edmonton.

Painful Sprains, Bruises, Restored By Nerviline

There is soothing power in Nerviline that has made it famous for nearly fifty years past. It sinks in deeply, it penetrates quickly, it takes away the pain from a sprain and brings great relief to bruised, aching muscles. If your joints are stiff and you are suffering from Rheumatism or Lumbago, if Neuralgia bothers you now and again, use trusty old "Nerviline." It works wonders, whether the pain is internal or external. Get a large 35-cent bottle from your dealer today.

The city of New York has brought suit to recover damages from the owner of a track which ran into a tree on the Grand Concourse in the Bronx, thus rendering the tree unfit to adorn.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

To Determine Pure Linen

Molson the druggists with water and apply to the surface of linen. If pure, the moisture will be visible on the reverse side almost immediately, but if not pure the moisture will not be absorbed so easily.

Powerful Medicine.—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electroic Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

New Electric Locomotive

Invention of Consulting Engineer Successfully Tested in England

Successful tests with a new electric locomotive are announced by the Westminster Gazette, London, which, the paper asserts, uses electrical traction of the entire railway system of the country.

It is the invention of Captain William Burinell, a consulting engineer. It dispenses with the need of substations along the route and utilizes a current of only 200-250 volts, thus eliminating the live rail danger. This voltage suffices for the usual speed on the level and extra power needed for gradients is obtained from storage batteries carried on the trains.

The following sign appeared recently on a golf course in Scotland: "Members will refrain from picking up golf balls until they have stopped rolling."

Minard's Liniment for chapped hands.

Gargle

ASPIRIN

Dissolve two "BAYER TABLETS OF ASPIRIN" in four tablespoonfuls of water and gargle thoroughly.

Swallow some of the solution. Don't rinse the mouth. Repeat gargle every two hours if necessary.

This is an effective gargle proved safe by millions and prescribed by physicians.

Safe Accept only "Bayer" package. Look for the "Bayer Cross."

Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists, Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoacetylsalicylic Acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Half Million Still Needed

Parliament Asked for Further Sum for Home Bank Relief

Canada's Parliament is to be asked to vote a further sum of half a million dollars for the relief of Home Bank depositors. Three million dollars have already been voted and disbursed in payments to all depositors for sums under \$500 and to a considerable number having on deposit over \$500 and who made affidavits that they were in need.

All the money voted by Parliament has now been expended and there are still claims totalling half a million dollars, which the judges of the exchequer court, who heard the claims of depositors for sums over \$500 hold have just claims and should be recognized along with the others.

Their lordships are prepared to make a strong recommendation to the Dominion Government in connection with these claims and will ask Parliament to vote the money. No new claims, however, will be received as the time has now expired.

Manitoba's Population

Substantial Gain is Shown Over the Census of 1921

The population of Manitoba is shown at 639,056 in the preliminary statement of the last census taken, as of June 1st, 1921, an increase of 28,938 over 1921, and 55,196 over 1916. There are 360,861 rural and 278,195 urban inhabitants, the former having increased by 12,359, and the latter by 16,579 since 1921. Winnipeg's population, placed at 191,998, shows an increase of 12,291 for the five years; Brandon, at 16,443, an increase of 1,406 and St. Boniface, at 14,187, an increase of 1,326.

Some men are too intellectual to be intelligent.

This Trade Mark

Is Worth Thousands

To look at the simple little trade mark shown above, the average man or woman would not think that it is worth many thousands of dollars but it is.

Any first-class Baker, knows that it is the mark of quality which is stamped on all our waxed paper and which means that the paper is absolutely pure and sanitary.

Only the Appleford Company can use it and that's why the best Bakers buy their paper only from Appleford. It is a real protection for their food stuffs and a real protection to your health.

Look for this Trade Mark on all paper when you buy food products.

We also make the famous Para-Sani Waxed Paper for household use.

Children Cry for

Fletcher's CASTORIA

MOTHER:—Fletcher's

Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitation, always look for the signature of **F. H. Fletcher** on each package. Physicians everywhere recommend it.

W. N. U. 1663

The Peace River Country, Now Attracting Attention, Is The Last Great West

Wheat from Peace River won premier honors in hard, red, spring wheat at the recent International Exposition at Chicago, and the victory again focussed Canadian eyes on that region. Notwithstanding the fact that the possibilities of the western prairies were themselves scouted in earlier days, to the later confounding of the sceptics, a similar inclination has been apparent in Peace River. The doubters, however, must now perforce hold their peace or add their voices to the acclaim of that country as the "last great West." But even that description must be subject to reservation. For who knows but that with the march of science and invention a still more remote field may not remain to be conquered and the limit line of wheat pushed nearer the Arctic wastes.

The people of the Peace River call their country "The Empire of the North," and no apter or more justifiable title was ever bestowed on a pioneer land. Once the world has fully grasped what it includes, more settlers will find their way to this splendid tract and the movement will be hastened when better railway facilities are provided. Meantime, the first step towards impressing the outside world with the attractions and potentialities of the Peace River Valley is for Canadians in other parts of the Dominion to make themselves familiar with these.

Romance saturates the story of the Peace River district. To read about it liberates deep impulses. One wants to see it, and breathe its bracing air and touch its fertile earth, to taste the life of those who live on so favored a frontier of civilization. It is, as the writer of a recent article says, a "veritable empire." And it is Canada's. The future of the region is assured. One day it will be thickly settled, with fine cities dotting the cultivated expanses of farmland. But the people of Canada as a whole and the people of Eastern Canada especially must learn of its present needs and its future promise before that dream can be realized.

The immediate needs of the country are adequate transportation facilities and more settlers. Then more people will go there. No searcher for a farming career under splendid conditions, can resist its call. Perhaps it is the last great west—is the land of peace in name and nature—and its advance to prosperity and greatness cannot be prevented.

Profitable Wheat Crop

Garnet Wheat Brings Good Returns to the Grower

T. A. Bain, a soldier settler in the Henribourough district, north of Prince Albert, Saskatchewan, seeded 12 acres to Garnet wheat in the spring of 1926. This field yielded 61 bushels to the acre, a total of 768 bushels of No. 2 Northern, which he sold as it came from the thresher at \$2 bushel, netting a total of \$1,536. The wheat was grown under normal conditions. The remainder of Mr. Bain's wheat crop, which was of the Ruby variety, yielded over 30 bushels to the acre.

Garnet wheat is a recent discovery by the Canadian Government Central Experimental Farm at Ottawa, and its outstanding points over Marquis wheat, also a discovery at the same farm, now the principal spring wheat grown in North America, are: It matures from seven to ten days earlier; it stands dry weather better; it stands excessive moisture better; it is more immune from rust and it will, it is expected, extend the wheat line 75 to 100 miles further north and open a new wheat field 900 miles from east to west—an area of 40,000,000 acres.

"Doesn't your wife miss you on evenings like this one?" asked one jolly good fellow of the other as they rolled homeward after the festivities.

"Well," replied the other, "not often. She can throw pretty straight for a woman."

"You only have five of these spoons, Mrs. Tugg!"

"Yes, I got them with coupons, and my husband died before we had enough for a full dozen."

Honors For Herman Trele

Granted Honorarium of \$500 From Alberta Department of Agriculture

Special honors have been paid to Herman Trele, winner of the sweepstakes in both wheat and oats at the Chicago International Show this year. The Alberta Department of Agriculture has granted him an honorarium of \$500, this being in line with the policy of the Department in honoring those who win championships for this province at the International. J. H. Hill, of Lloydminster, was given \$100 for securing first prize at Chicago for field peas.

Will Utilize Garbage

German Engineer Devises Method to Manufacture Useful Products

Can cotton or artificial silk may be manufactured from the garbage of great cities, it is claimed, under a method evolved by Kurt Gerson, a Berlin engineer. It is done, he says, by sifting and subjecting all the cellulose ingredients to a special treatment. By distilling the remaining refuse, such as potato peelings and pieces of wood, he claims to produce tar, charcoal and acetic acid. A large plant is being constructed here under his specifications.

An Effective New Frock

Charm and grace are admirably combined in this delightful frock. The two-piece skirt is shirred to the bodice having tucks at each shoulder. The original application of lace or contrasting material is effectively used on the bodice, skirt, and cuffs finishing the long tight-fitting sleeves. A wide crushed girdle fastens with a buckle at the front, and buttons adorn the bodice front, thereby giving the modish vest effect. No. 1494 is for ladies and misses and is in sizes 16, 18 years, 28, 40 and 42 inches bust. Size 38 requires 3 1/2 yards 39-inch material, and 1 1/2 yards 39-inch trimming. 20 cents.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her tastes fulfilled in our patterns. Price of the book 10 cents the copy.

New Zealand Repeats Order

Second Shipment of Lacewing Flies Sent From British Columbia

Five thousand lacewing flies from the Okanagan country were shipped to New Zealand recently on the steamship Aorangi.

In New Zealand the larvae of the lacewing fly is used to control the aphids, or green fly, most destructive tree pest known to the islands.

Several unsuccessful attempts were made to import lacewings into New Zealand before British Columbia was called on to send a shipment last year as a sort of experiment. On the previous occasion due to faulty packing, the flies died before reaching New Zealand, but the British Columbia flies were apparently none the worse for the sea voyage and as soon as they were liberated in New Zealand they promptly proceeded to annihilate the hosts of the aphid. Their good work led to orders for more of them this year.

English People Are Eating More Oranges

Several Reasons Given for Rapidly Increasing Demand

Fruiters all over England report an increasing demand for oranges.

It is estimated that more than 2,000,000,000 oranges were eaten last year, and this total will probably be exceeded this year.

Some of the reasons which are given for the increased demand for oranges are:

They are good for the complexion. They are of benefit in cases of sore throat. They help to cure influenza. They soothe the nerves. They cure insomnia.

Lethbridge Irrigation District

Steady Colonization Program Results in Rapid Settlement

Eleven cars of settlers and effects moved from Foremost to Turin in the Lethbridge Northern Irrigation District, on December 6th. They were well supplied with livestock, equipment and household effects. This movement into the big irrigation area north of Lethbridge is only an outstanding feature of a steady colonization program that has been actively under way for some time. Since August, 1925, 325 families have been placed on Lethbridge Northern farms, and in practically every case they are happy and prospering.

Sweepstakes at Fox Shows

The grand sweepstakes championship of the Fox Show, in conjunction with the Winter Fair at Vancouver, was awarded to the All-Star Fox Ranch, of Winnipeg, as well as the grand championship in various classes. Honors also went to Medicine Hat, Alberta, and Summerside, P.E.I.

If you were living in Russia there would be no Christmas, because the Bolsheviks don't believe in Christianity.

Movement To Interest The Better Educated Youth Of Britain In Canadian Agriculture

Wheat Production Cost

Manitoba Farmers Shown to be Better Situated Than Neighbors to the South

The net cost of producing an acre of wheat in Manitoba in 1923 was \$10.02, as compared with \$10.76 in the States of North Dakota and Minnesota, and the Manitoba acre produced 12.3 bushels of wheat, while that across the border yielded only 10.03 bushels, the cost per bushel of wheat being 81 cents in Manitoba and \$1.20 in North Dakota and Minnesota, according to Professor H. C. Grant, of the Economics Department of the Manitoba Agricultural College, addressing the Winnipeg Board of Trade. These costs do not include the rent of land," he added. "If interest for money invested in land were considered the Manitoba farmer would be still better off than his neighbor across the border, for the charges in this connection are about \$1.00 per acre lower than in the States to the south.

Canadian Apple Exports

Will Exceed by Fifty Per Cent Shipments of Last Year

It is estimated that exports of apples from Canada will this year exceed by fifty per cent those of last year. The export of apples from Canada in the last fiscal year ended March 31, 1926, amounted to 1,388,493 barrels worth \$6,250,186. The bulk of the exports go to the British Isles which last year took 1,290,650 barrels worth \$5,743,069. Other heavy purchasers are the United States, New Zealand, Sweden, Newfoundland, China, Hong Kong and Denmark. The principal apple growing provinces in Canada are Nova Scotia, Ontario and British Columbia, though New Brunswick and Quebec grow apples and several other fruits such as pears and plums, in commercial quantities.

Protecting Warsaw Banks

Poland awoke on the first business day of the New Year to find 20 of its banks closed by Government order, because they lacked the required paid in capital of 1,000,000 zlotis—\$116,000. The provision as to the exact amount of paid in capital is part of the Finance Minister's campaign against "mushroom" banks.

Seller visited the Widow Redek every evening and had tea with her. "Why don't you marry her?" asked a friend.

"I have often thought about it," said Seller, "but where should I spend my evenings then?"

Mrs. Carstairs—"And this is my husband's den."

Mrs. Ruperts—"How interesting! What's his hobby—hons or opium?"

Teaching Old Sailors New Tricks

Sailors pride themselves in being handy with ropes. It's all in their day's work. When Guy Weadick, manager of the Calgary Stampede, stepped aboard the Canadian Pacific Empress of Scotland at New York recently and began to twirl his lasso, the sailors learned a few new tricks. The photo above was taken just before the Empress of Scotland sailed from New York, December 2, on her round-the-world cruise. Guy Weadick is the tall man in the centre of the group, while the fat and jolly sailor at his right is Albert Gilbert who dons a beard and officiates as "Neptune" when the Empress of Scotland crosses the "line," the Equator, during her world tour.

The visit to Canada of forty students of Oxford University and Wyke Agricultural College, Kent, went yet further to prove that Canada has only to be seen by young men of such intelligence and training for her opportunity to be immediately appreciated and her lure irresistibly felt. These young men were brought out from England by the Department of Colonization and Development of the Canadian Pacific Railway to afford them opportunity of gaining firsthand impressions of Western Canada through actual labor in the harvest fields of Saskatchewan, and from the standpoint of future Canadian Development at the hands of Britishers of this class probably a more fruitful step was never taken. Each returned to his home in various parts of the British Isles enthusiastic over Canadian agricultural possibility and intent on broadcasting his impressions.

These young men, specially trained, were in a peculiar position to appraise Canada's openings in farm careers, and for this reason their uniform enthusiasm was the more gratifying. Then, too, the party returned to the homeland depleted by some few who had succumbed to the lure of the Western plains and remained there permanently. At least a dozen more voiced a determination to return after the completion of their college course, a substantial proportion in view of the fact that half of the party was assured of positions in the British Isles after graduation. Without a doubt Canada has in these young men the finest of missionaries of her agricultural cause, from the dissemination of whose testimony great benefit is to be expected, especially in the hope which is expressed that it may be possible to make visits of British agricultural students to the Western harvest fields annual events.

It is striking to note at the present time, the various endeavors which are being made to interest the better educated youth of the British Isles in Canadian agriculture and to aid him intelligently to successful farm establishment. This, it is recognized, is to the mutual aid of Canada, and the Motherland, since, in the situation existing in the British Isles, it is difficult to launch such youths upon promising careers, whilst Canada has urgent need of their calibre and training. From the haphazard movement of such young men in the past, Canada has learnt a good deal, and it is upon this knowledge that the various schemes of assistance are based.

The Canadian Pacific Railway has been very much to the fore in this matter and originated in co-operation with Macdonald Agricultural College the scheme for the movement of secondary school boys from the British Isles, their education at the agricultural college, placement upon farms for training, and continual supervision up to the point of actual farm establishment effected under the auspices of the committee. The inaugural year of the scheme has been responsible for sending thirty-five English secondary school boys in the path leading to successful farm careers, and a hundred per cent success is recorded. A further party of fifty boys will, it is expected, be recruited in the spring, and thereafter the movement is expected to steadily gather momentum to the mutual benefit of Canada and the Motherland.

Washington Settlers' Success

Finds Western Canada Offers Good Opportunities for the Worker

Fifteen years ago Ernest Munsterman came from Colton, Washington, U.S.A., and filed on 160 acres of homestead land at Rossleigh, Alberta. He then had only \$150. How successful he has been in Canada is indicated by the fact that he now owns 700 acres, 650 of which are under cultivation and he has a good home, spacious farm buildings and a full line of equipment. He values his property at \$35,000. Mr. Munsterman, in a letter sent recently to the Edmonton, Alberta, Board of Trade, states that he would advise anyone to settle on a farm in Alberta, where land is cheap and fertile, the climate healthful, the educational advantages good and taxes low. He gives as the essential to success "to dig in and work hard."

WORLD HAPPENINGS
BRIEFLY TOLD

Liepzig, Germany, has inaugurated most intensive tests known for prospective motor drivers.

School boys of England are being taken to New Zealand and instructed in farming under a plan of the Chamber of Commerce, of Tarnaki, N.Z.

Duelling with rapiers, a favorite pre-war pastime of German students fraternities, has been declared unlawful by the supreme court of Liepzig.

The British Admiralty has ordered the construction of a 10,000 ton cruiser. The cruiser, which is provided for in the current naval estimates, will be built in Glasgow.

Approximately one passenger out of 8,250,000 carried is killed on Canadian steam railways, according to returns to the railway department. One passenger out of each 111,000 is injured.

The Blue Star liner Arandora, 14,000 tons, fifth and last of a fleet of new vessels for a fast fortnightly service between London and South American ports, was launched recently.

Three eclipses of the sun, two eclipses of the moon and the transit of the planet Mercury over the sun's discs are all included in the program for 1927, it is stated by Professor A. J. Kelly, of the McGill Observatory, Montreal.

By an overwhelming vote the U.S. Senate refused to consider in open session the treaty of Lausanne, which would re-establish diplomatic and commercial relations with Turkey. The treaty is opposed by a number of Democrats.

Col. C. R. E. Willets, commander of the Princess Patricia Regiment since 1920, with headquarters in Winnipeg, has been promoted to headquarters staff in Ottawa. Major M. R. T. Broeck will succeed Col. Willets as commander.

Vodka drinking in Russia has become so great an evil that the communists of health, justice and the interior are jointly drawing up severe measures to repress it. They propose to forcibly seize chronic alcoholics whenever they are found intoxicated and to subject them to a drastic sobering treatment in hospitals.

Every careful and observant mother knows when her child suffers from worms. She also knows that if some remedy be not speedily applied much harm will result to the infant. An excellent preparation for this purpose is Miller's Worm Powders. They drive worms from the system and set up stimulating and soothing effects, so that the child's progress thereafter is painless and satisfying.

Canadian Legation in Washington

It is expected that the Canadian Legation will open in Washington, D.C., sometime in February. Hon. Vincent Massey, who has been appointed to represent Canada in the American capital, is completing the arrangements in connection with the opening of the legation.

For Colds—Minard's Liniment.

Russian Girls Have Vocation

It is a characteristic of modern Russia that every woman and girl seems to devote herself to some vocation or other, and may enlist as a soldier if she desires, said Paula Steiner, woman journalist, lecturing in the women's Lyceum Club, Berlin, on her repeated visits to Russia.

Could Not Sleep
Heart and Nerves
Were So Bad

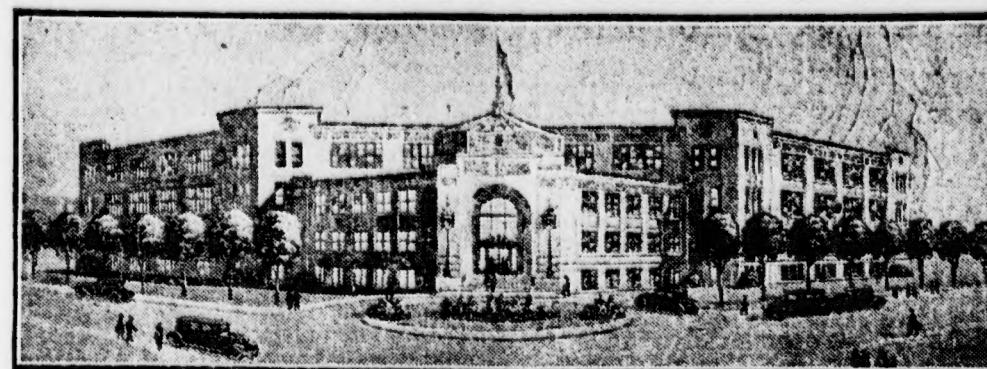

Mr. Geo. Meek, Windsor, Ont., writes:—"I suffered with my heart and nerves and could not sleep at night for noises in my head. I managed to keep at my work somehow, until I began to have dizzy spells which got so bad I could not go to my work. I was afraid to go out any place, for very often I would stagger on my feet, and everything in front of me would turn black and fade away. While I was home sick a friend told me to take

I got four boxes and by the time I had used them the pains and noises in my head ceased and I was able to get a good night's rest. Although that was six years ago I have never been troubled with that complaint again."

Price 50c. a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

W. N. U. 1663

MAGNIFICENT PLANT FOR CROSSE & BLACKWELL

About 1,200 people will be employed in the new Canadian Plant of Crosse and Blackwell, Limited, internationally known British Firm and producers of pure food products. The above drawing shows the

\$1,000,000 building to be erected at Toronto. Here will be produced a complete assortment of jams, conserves, pickles, sauces, potted meats, and the quality of all Crosse and Blackwell products manufactured here will be main-

tained to the same unexcelled standard of perfection which has prevailed for more than two centuries. Meanwhile, C. & B. products imported direct from England are available at all the grocers who carry high class goods.

Woman Heads Organ Business

English Manufacturing Firm Has Been Family Concern Since 1750

Old fashioned long skirts interfered with Miss Jess Gray Davison learning to play an organ as a girl but this has not prevented Miss Davison from becoming the only woman managing firm in England. The business has been a family concern since 1750, and Miss Davison took charge on account of the illness of two brothers. Her grandmother considered it was "unlady-like" for Miss Davison to play the organ as a girl because "the long skirts worn in those days might get mixed up with the pedals."

No man or woman should hobble painfully about because of corns when a certain relief is at hand as Holloway's Corn Remover.

1336

The Very Important One-Piece Dress

Adhering to the straight-line silhouette, this model would be very trim for sports wear or business. The charming simplicity of its cut is emphasized by such adornments as a row of buttons down the closing from neck to waist, and patch pockets, while there are slight gathers at each shoulder. Long sleeves are gathered to narrow wristbands and the round collar is of the latest mode. No. 1336 is for misses in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3 1/2 yards, 36 inch, or 2 1/4 yards 54 inch material, 20 cents.

Our Fashion Book, Illustrating the newest and most practical styles, will be of interest to every home dress maker. Price of the book 10 cents the copy.

Greets Boy Scouts

Governor-General Issues New Year's Greetings to Scouts of Canada

His excellency the Governor-General, as chief Scout for Canada, issued the following New Year's greeting to the Boy Scouts of the Dominion:—

"I consider it a great pride and pleasure at this season, as chief Scout of Canada, to send warm greetings to all Boy Scouts from the most senior commissioner to the youngest Wolf Cub. I trust and pray that the year 1927 will bring you all health, happiness and prosperity and give you opportunities of many acts of brotherhood and service for the honor of your Motherland.

"I hope to have many opportunities of meeting and greeting you all during the coming year."

Treat Colds Externally

For sore throat, bronchitis or deep chest colds, rub Vicks VapoRub briskly over throat and chest and cover with warm flannel.

Vicks acts in two ways—both direct: absorbed like a liniment and inhaled as a vapor. A quick relief for the cold troubles of all the family.

CHAPTER XXIV—Continued

"I'm afraid I can't tell you much more than people generally know," she replied. "It came about after I left America with Yvonne. I ran away, you know, because no one I knew there had any confidence in me."

Prince Michael detected a seriousness as of some repressed plaint, and thought it needed observance. He sought her hand and would have put his over it, oblivious to the others at the table. Joanna brought her hand away. Quietly, she went on:

"Before then we had been quite good friends. I remember he had some plan for a memorial, something he wanted some day to build. I was never interested, much, because it wasn't anything I could understand, or wanted to. I remember, though, he objected to its being called a 'war' memorial. It was to be something commemorating soldiers themselves. All kind of soldiers, I think—not only our own, but of other countries as well. Somehow he's made it known about, I suppose. Now when you have a mind to talk to him about it, you will know almost as much as I do."

"Morbid idea, though," the prince observed. "I can't imagine anything I'd run away from quicker than a reminder of that sort. Sentimental though. I suppose they'll always be doing things of the kind."

"The striking feature of his conception," Yvonne remarked, "seems

Mrs. J. B. Hiltz

Toronto, Ont.—"I found Dr. Pierce's Favorite Prescription very beneficial. During my third expectant period I was nauseated, my nerves went to pieces and I grew so weak and miserable that I could not do anything. I finally began taking Dr. Pierce's Favorite Prescription and from that on I got along fine. My nerves quieted down, I grew stronger and had a very healthy baby. She always has been exceedingly well. 'Favorite Prescription' is the greatest help in motherhood of any medicine a woman can take"—Mrs. J. B. Hiltz, 53 Sydenham St.

Go to your neighborhood drug store at once and obtain this Prescription in tablets or liquid, or send 10 cents to Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial package of tablets.

Simple Colds indicate a need of
**SCOTT'S
EMULSION**
to build resistance

She had observed that Kenilworth, while he gave his part to the discussion, was uneasy. He had studied Joanna's face constantly, and watched every changing light in her eyes and line about her hips. She proposed a turn about the Casino rooms. "We shall have time for an hour of play in *trent et quarante* hall." Prince Michael appropriated her at once, much to Joanna's satisfaction, and led the way along the avenue of poplars through the Casino gardens to the white terrace.

Kenilworth, lagging behind with Joanna, went directly to the subject that concerned him deeply. "You are not going to let his turning up interfere with things, are you?" he asked.

"So far as I can remember," she returned, "he has never interfered much with me. Used to want to, of course, but couldn't then. I could hardly fancy him being much of an influence now."

"Have you, then, completely wiped him out? As you seemed to imply that night when you invited me to join you in a kiss?"

She laughed. "That was so many ages ago, Roddy! I'd lost track of that one."

"That is evading the question," he rebuked her.

"John wouldn't have me then," she said simply, "when I thought he was the one thing in all the world I wanted to buy with my money. I doubt if he'd want me at all now. He's famous, you see, and well on the road to prosperity. He won't need to take chances. I'm not as good a bet for him now as I was then. Am I, Roddy?" She was daring him with her smile. There was wistfulness in it at all, just frank, open provocation.

"Do you know," he exclaimed, irritably, "you are the most unfathomable creature within my experience?"

She was silent until they came up to the terrace steps. She answered him then as if there had been no lapse of time. "No, I'm not. I was thoroughly fathomed this morning. A man told me he wanted me however and whatever I am. If I could say just what I'd like to say about that, I'd say that would be a damn safe bargain for a man to make with any girl. But I can't say that, of course, for I must be a hypocrite and let on that I never swear."

CHAPTER XXV.

When Joanna Gambles

Kenilworth would have guided his companion around the big Casino building to the pigeon field which lies between it and the sea, but Joanna preferred to go onto the white terrace and into the gambling rooms.

In Roddy's manner there was every sign of the truth of Yvonne's observation in the Trianon summer house at Amette; that he was worried by the reappearance of John in the girl's scheme of things. Secretly she was disturbed by him. During the months in New York, before her departure for London and France, he had been a supercilious admirer, graceful in his devotions, impressing her as a man of the world who had decided to affect enthusiasm over a new joy. Then, suddenly, his attitude and his purpose had altered.

He had deliberately followed her and Yvonne to London. It was then that circle of men and women which revolved about men of his kind, young men who are old enough to be discreet and rich enough to be idle, began to take stock of the seriousness of Roddy Kenilworth in his pursuit of the young American millionairess, Joanna Manners.

There was a great deal of boudoir grief over this state of affairs, for Kenilworth was known as one

who went from one affair to another at slight provocation, but always magnificently—generously. It was felt that if he were definitely lost to his world of sub rosa romance it would be disastrous.

It was generally wished that the young American, whose fresh youth had proved an irresistible charm

Tickling Throat

where charm is translated in terms of flesh, would succumb to the inevitable—or, to Roddy's determinations—and in the usual course, free him for his next feminine engagement. "For," said one young woman to her dancing partner at the fashionable Embassy Club, "Roddy looks as though he were going to be serious, this time; he hasn't had a serious affair since the early days of Yvonne Coutant. He won't be a free agent until he gets over this attack, and the American is delaying matters."

Joanna liked Roddy Kenilworth. She had heard, as people do hear, that Yvonne had been of his making. How much to believe and what to discount she didn't know, nor care. She gloried in her ability, the who had come out from behind silk counter, to bring the green tints into his eyes whenever she was of the whim to make him take note of her. She knew Roddy was in a continual fight with himself over her. Dornilster was always her slave. Brandon served her whenever she asked, but he remained aloof; she couldn't sway him—or, rather, she wouldn't dare. But Roddy made an occasional effort to baffle the spell of her, and to thwart him was like quaffing champagne.

(To Be Continued)

CHILBLAINS

Zam-Buk soon relieves the inflammation and swelling, dulls the tingling pain and soothes the maddening irritation. Where skin is broken, festers or ulcerated Zam-Buk is doubly valuable because of its great healing and antiseptic power.

Business Failures In Britain

Millinery and Dressmaking Headed List for Women, and Farming for Men

Women who failed in business last year are honored with a separate section in the annual bankruptcy returns.

They number 114, millinery and dressmaking, with 47, had the greatest number of women failures. Of the rest 37 were drapers, 33 grocers, 21 clothiers and outfitters, and 20 lodging house keepers. One woman doctor, four schoolmistresses and one woman engaged in horse dealing and training were also adjudged bankrupt.

Farmers head the list of men with 368 bankruptcies. Grocers come next with 362, and builders third with 335. Pawnbrokers and shipowners tie for bottom place with only four apiece.

EFFICIENCY IMPAIRED

Why Many Men and Women Are Badly Handicapped

When you are so run down in health that it impairs the efficiency of your work as well as your power to enjoy your leisure hours, or obtain rest, it is time you looked to the cause. If you do not, a serious breakdown is almost sure to result sooner or later. In nearly all cases this condition, which doctors usually describe as general debility, is due to poor blood—blood that is deficient in red corpuscles. When the blood is thin and weak your whole system suffers. You lose appetite, have no energy, your nerves trouble you and you feel restless.

—Stafford A. Brooke.

Fortune From Christmas Cards

Million and Half Left by Late Sir Adolph Tuck

Recently there was made public the will disposing of the \$1,600,000 Christmas card fortune of Sir Adolph Tuck, late chairman of Raphael Tuck, Ltd., by far the greatest Christmas card firm in the world. Perhaps in revulsion from the religious festival on which his fortune was built, Sir Adolph provided that any of his children who marries a Christian or outside of the Jewish faith shall be disinherited. All public bequests are made to Jewish institutions.

Excellent for Croupy Children.—When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer. It is equally reliable for sore throat and chest, earache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

He had deliberately followed her and Yvonne to London. It was then that circle of men and women which revolved about men of his kind, young men who are old enough to be discreet and rich enough to be idle, began to take stock of the seriousness of Roddy Kenilworth in his pursuit of the young American millionairess, Joanna Manners.

There was a great deal of boudoir grief over this state of affairs, for Kenilworth was known as one

who went from one affair to another at slight provocation, but always magnificently—generously. It was felt that if he were definitely lost to his world of sub rosa romance it would be disastrous.

Saskatchewan Creamery Butter

Creamery butter production in Saskatchewan from January 1st to October 31st, 1926, totalled 15,750,501 pounds, an increase of 1,234,418 pounds over the record for the corresponding period of 1925. Unfavorable weather in September and October caused a reduction in output in those months compared with the figures for the same months last year.

The automobile bill of the American people is over \$11,000,000,000 a year.

for Coughs and Colds

A Pleasant Sip—Instant Relief

There is an effective way to pleasantly relieve that distressing Cough. Buckley's Mixture is delightful and "friendly". Yet it acts like a flash in clearing the throat and chest. One dose stops coughing—and there are 40 doses in a 75-cent bottle! All druggists sell it under a money-back guarantee.
